

hey, why on earth would there be any problems with me being able to get traffic and weather reports on XM radio? There should be no censorship. Period. I am sure that big business have lobbyists trying to get you to shut down any avenue where they can't bombard us with advertsments, so pick on something else. I pay extra money so I don't have to endure advertising and I really like XM. I will continue to pay to listen to music that I as an adult choose to. So give it up, there has to be some crappy cable access program showing porn to children that you could waste your time on, or maybe censor some of the horrific war images I keep seeing on the nightly news. Think with your consciences not with your pocketbooks! Feel free to call me if you would like to hear more of my thoughts on the fcc and big business. (206) 250-4027.
